

Education

- May 2019 **Expected: Ph.D. Chemical Engineering**, *University of Pittsburgh*, Pittsburgh, PA.
Applied electronic structure methods to elucidate nanomaterials growth and stability.
Advisor: Giannis Mpourmpakis
- May 2013 **B.S. Chemical Engineering**, *University of Nebraska-Lincoln*, Lincoln, NE.
Cum Laude

Research Experience

- 2014-Present **PhD. Graduate Research Assistant**, *University of Pittsburgh, Department of Chemical and Petroleum Engineering*, Pittsburgh, PA.
Atomically-precise nanoparticle growth and stability
I apply Density Functional Theory (DFT) methods and chemical structure analysis techniques to understand the stability and growth of metal nanoclusters. Beyond monometallic clusters I have looked into doping and growth of bimetallic clusters and the resultant shift in electronic properties. I am using our findings to focus on computational design of metal nanoclusters.
Rationalization of kidney stone growth modifier efficacy
I use DFT to calculate adsorption and facet-preference for different growth modifiers to kidney stones. I helped rationalize dissolution of kidney stones observed in experiments.
Stability of nanoalloys
I have helped develop a model for screening the stability of nanoalloys based on size, shape, composition, and chemical ordering descriptors. I apply this new model for nanoalloy design.
- Summer 2012 **NSF Research Experience for Undergraduates (REU) Fellow**, *University of Pittsburgh*, Pittsburgh, PA.
Advisor: J. Karl Johnson
Zwitterion-functionalized carbon nanotubes for desalination
I used Molecular Dynamics (MD) to explore efficient desalination in carbon nanotube materials.
- 2011–2013 **Undergraduate Research Assistant**, *University of Nebraska-Lincoln*, Lincoln, NE.
Functionalized chitosan microspheres for targeted DNA detection
- Summer 2010 **Undergraduate Research Assistant**, *Creighton University*, Omaha, NE.
Understanding inner-ear developmental biology in mouse models

Awards and Grants

- Dec. 2017 **Lead: Extreme Science and Engineering Discovery Environment (XSEDE) Proposal**, *National Science Foundation (NSF)*, \$32,355.54.
- Mar. 2017 **Best Poster Presentation**, *Advancing Research through Computing (ARC) Conference*, University of Pittsburgh, \$500 Travel Grant.
- Jan. 2017 **University of Pittsburgh GPSG Travel Grant**, \$500.
- Dec. 2016 **Contributed: XSEDE Proposal**, *NSF*, \$28,015.28.
- Apr. 2016 **Graduate Research Fellowship Program (GRFP) - Awarded**, *NSF*, \$34,000 Stipend + \$12,000 Tuition Waiver for 3 Years.
- Dec. 2015 **Contributed: XSEDE Proposal**, *NSF*, \$83,860.70.
- Apr. 2015 **GRFP - Honorable Mention**, *NSF*.

Presentations

- 2018 M. G. Taylor and G. Mpourmpakis, *Rationalizing Stability of Atomically-precise, Ligand-protect Nanoclusters*, **Oral presentation**, Department of Chemical and Petroleum Engineering Research Day 2018, Pittsburgh, PA, USA. 20 February 2018.
- 2017 M. G. Taylor and G. Mpourmpakis, *Stability and Prediction of Thiolated Metal Nanoclusters*, **Poster presentation**, Advancing Research through Computing (ARC) Conference, Pittsburgh, PA, USA. 2 March 2017.
- 2016 M. G. Taylor and G. Mpourmpakis, *Structure-Dependent Stability of Magic-Number Thiolated Metal Nanoparticles*, **Oral presentation**, AIChE Annual Meeting 2016, San Francisco, CA, USA. 16 November 2016.
- M.G. Taylor, J. Chung, J. D. Rimer, and G. Mpourmpakis, *Elucidating the Mechanisms for Kidney Stone Growth Inhibition and Dissolution*, **Poster presentation**, Department of Chemical and Petroleum Engineering Research Day 2016, Pittsburgh, PA, USA. 25 October 2016.
- M. G. Taylor and G. Mpourmpakis, *Modeling the structure-dependent stability of thiolated metal nanoparticles*, **Oral presentation**, ACS Fall National Meeting 2016, Philadelphia, PA, USA. 23 August 2016.
- M. G. Taylor and G. Mpourmpakis, *Exploring the Structure-Dependent Stability of Thiolated Metal Nanoparticles*, **Poster presentation**, Midwest Theoretical Chemistry Conference (MWTCC) 2016, Pittsburgh, PA, USA. 9 June 2016.
- 2015 M.G. Taylor, J. Chung, I. Carnaval, J. D. Rimer and G. Mpourmpakis, *Kidney Stone Growth Modification: Insights from First Principles Calculations*, **Oral presentation**, AIChE Annual Meeting 2015, Salt Lake City, UT, USA. 12 November 2015.

M. G. Taylor, J. Chung, I. Carnaval, J. D. Rimer, and G. Mpourmpakis, *Kidney Stone Growth Modification: Insights from First Principles*, **Oral presentation**, Carnegie Mellon University - Pittsburgh Simulator's Meeting 2015, Pittsburgh, PA, USA. 20 May 2015.

M. G. Taylor, J. Chung, I. Carnaval, J. D. Rimer, and G. Mpourmpakis, *Kidney Stone Growth Modification: Insights from First Principles*, **Poster presentation**, Department of Chemical and Petroleum Engineering Research Day 2015, Pittsburgh, PA, USA. 17 March 2015.

- 2012 M. G. Taylor, H-y. Chen, and J. K. Johnson, *Zwitterion-Functionalized CNTs for Efficient Desalination*, **Poster presentation**, AIChE Annual Meeting 2012 - Student Session, Pittsburgh, PA, USA. 29 October 2012.

Leadership, Outreach, and Broader Impacts

- 2015-2017 **Chemical Engineering Graduate Student Association (GSA) President**, *University of Pittsburgh*.

Organization: Led the department research day 2016. Started and coordinated joint happy hours with Carnegie Mellon University department of chemical engineering 2015-2016. Helped coordinate recruiting events for incoming PhD students 2015-2017.

Volunteering: Co-coordinated department involvement in educational outreach at the Engineer the Future and National Chemistry Day events at the Carnegie Science center in Pittsburgh with *at least 4,000 students*, 2016-2017. Helped lead volunteer efforts to clean the city of Pittsburgh.

- 2017-2018 **Ingenium editorial board**, *Swanson School of Engineering*, University of Pittsburgh.

Served on the editorial board as a reviewer for Ingenium, the school of engineering undergraduate publication.

- Apr. 2017 **High school outreach presentation**, *Central Catholic High School*, Pittsburgh, PA.

Presented an informative and motivational talk on my experiences as a chemical engineer and as a scientist to a high school, pre-engineering class of around 50 students.

- Apr. 2016 **Undergraduate research seminar presentation**, *University of Pittsburgh*, Department of Chemical Engineering.

Presented my research and experiences in graduate school to the undergraduates in the department towards inspiring and influencing them towards careers in science.

- Apr. 2015 **Intel International Science and Engineering Fair (ISEF)**, *Pittsburgh, PA*.

Served as volunteer for safety and initial inspection of posters at the international high-school science fair.

Teaching and Advising Experience

- Spring 2017 **Teaching Assistant, CHE 200 - Chemical Engineering Thermodynamics**, *University of Pittsburgh*, 70 Students.

Lead five, two-hour recitations on problem solving and further conceptual understanding.

Presented two-hour lecture on excess properties and the thermodynamics of mixtures, connected these properties to cutting-edge research.

- Spring 2016 **Teaching Assistant, CHE 200 - Chemical Engineering Thermodynamics**, *University of Pittsburgh*, 70 Students.

Presented 2-hour lecture on chemical equilibrium and chemical potential.

- Spring 2015 **Teaching Assistant, CHE 200 - Chemical Engineering Thermodynamics**, *University of Pittsburgh*, 70 Students.

- 2015-2018 **Research mentoring and advising**.

Undergraduates: Isadora Carnaval (2015), Peter Tancini (2015-2016), John Hoover (2016), Ashley Mascareno (Summer 2017) (Co-Author on publication)

Masters: Zihao Yan (2016-2018) (1st author publication)

Computing

Languages	Python, FORTRAN, UNIX shell (BASH), ASE package, R, MATLAB
Modeling	CP ₂ K, Turbomole, LAMMPS, DFTB+
Platforms	GNU/Linux, MacOS, Windows
Web	Github Pages/Jekyll
Visualization	Blender, GIMP, Origin, Inkscape
Development	git, vim
